

AMIT DAS

Software Developer | React | Next.js | TypeScript
+91-7679480267 | iamamitdas2008@gmail.com | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Results-driven Software Developer with 3.9+ years of experience designing and delivering scalable, high-performance web applications. Proficient in React, Next.js, and TypeScript with a strong track record in data-intensive dashboards, real-time tracking systems, and REST API integration. Demonstrated ability to modernize legacy codebases, improve UX, and optimize application performance. Adept at collaborating in agile environments and committed to writing clean, maintainable, production-ready code.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, SQL, Java

Frontend: React.js, Next.js, Redux, React Query, Tailwind CSS, shadcn/ui, HTML5, CSS3

Backend: Node.js, Express.js, REST APIs

Real-Time: Socket.io, WebSockets

Mobile: React Native, Expo

DevOps/Tools: Docker, Git, Linux, Vercel

Architecture: Component-Driven Development, Reusable Component Libraries, API Caching, Performance Optimization

WORK EXPERIENCE

Software Developer — DISTRONIX

July 2022 – Present

3.9 Years | Kolkata, India

- Modernized legacy jQuery/PHP dashboards to React + TypeScript + Next.js, reducing load times by improving component rendering and eliminating redundant DOM operations.
- Architected and shipped reusable UI component library using Tailwind CSS and shadcn/ui, cutting feature development time across projects by standardizing design patterns.
- Integrated REST APIs with React Query (caching, background refetching, pagination), improving data-fetch efficiency and reducing unnecessary server calls.
- Containerized frontend and backend services with Docker, streamlining CI/CD pipelines and enabling consistent staging-to-production deployments.
- Collaborated with cross-functional teams (backend engineers, QA, product) in an agile workflow, consistently delivering features on time with high code quality.
- Conducted code reviews and enforced best practices — TypeScript strict typing, ESLint rules, modular file structure — across a team of 4+ developers.

PROJECTS

CAAQMS – Continuous Ambient Air Quality Monitoring System

2023 – Present

Next.js | TypeScript | Redux | Tailwind CSS | shadcn/ui | REST APIs

- Built a data-intensive environmental dashboard consuming real-time and historical sensor data for 10+ pollutants (PM2.5, PM10, SO2, NO2, CO, O3, NH3, Benzene) across multiple monitoring stations.
- Implemented interactive chart modules (line, bar, scatter) with drill-down capability, enabling operators to identify pollution trends and anomalies at a glance.
- Developed a historical data module with multi-parameter filters, date-range selection, and CSV/Excel export — used daily by regulatory reporting teams.
- Built a diagnostic module for maintenance scheduling, calibration tracking, and analyzer health monitoring, reducing unplanned downtime for field teams.
- Optimized rendering of data grids with 10,000+ rows using virtualization and memoization techniques, achieving smooth 60fps scrolling performance.

Vehicle Tracking System – Solid Waste Management

2022 – 2023

React | Vite | Tailwind CSS | Socket.io | Expo (React Native) | NFC

- Developed a real-time fleet tracking dashboard using Socket.io, displaying live vehicle positions, speed, and operational status updated every 2–3 seconds without page refresh.
- Built live map visualization for 20+ vehicles, with route history overlays and status color-coding (active / idle / offline).
- Implemented waste collection monitoring via NFC smart tags — field workers scan tags at collection points; dashboard updates instantly via WebSocket events.
- Delivered a cross-platform React Native (Expo) mobile app for field operatives, featuring NFC tag scanning, geotagged image upload, and offline-capable sync.
- Achieved responsive performance on low-end Android devices by optimizing state updates, minimizing re-renders, and batching Socket.io event handlers.

EDUCATION

B.Tech in Information Technology

Jun 2018 – Jun 2022

University of Calcutta | CGPA: 8.05 / 10.0

CERTIFICATIONS

React – The Complete Guide | Udemy | May 2025
